

A PICTURE SAYS MORE THAN A THOUSAND WORDS!

Do you find that it is pleasant that there is always enough of the right screws in your shelves?

Even if you know that screws are picked from the shelves the second you turn your back!!!

If someone other very reliable person were sitting somewhere else in the world helping you, so that you could concentrate on producing, would you feel more effective then?

The Webcam continuously supervises your shelves with photo technique transferable over the Internet.

Makes work easier

If you want to have your shelves under continuously observation, we have the solution. Let our KAM-MERA system do the work for you. All you need to do is to give us access to an external telephone line or access to your local network. We then deliver the screws directly to your shelf!

Advantages:

- We cover the shelves with press of a button, where you normally have to walk several meters between different assembling areas.
- Cheaper than systems with weight sensors.
- XML-file accessible for integration with your own computer system.
- One camera covers 40-100 items.

Investment: About €500 and one IP-address / Camera or a high speed connection.

The system KAM-MERA

Depending on your conditions, you choose how often you want us to check the stock situation.

Mattssons co-worker is refilling your stock, directly at the assembly line.

Do you want us to refill the shelves?

The question of having the stock refilled from an external supplier or to manage it yourself is mostly depending on the policy's you have as a customer.

Furthermore, it could depend on your production series. Are there big series or small customer-related batches? Do you use "management by objectives for your work groups"? Do you need a varied work content for your mounting personnel?

You have the knowledge. You make the decisions. Mattssons can, whatever choice you make, deliver the smartest solution.

If you chose Mattssons as a supplier for external refilling of fasteners, we debit a running cost for the logistics. Mattssons are always developing new methods for ordering and refilling your stock of fasteners in the most cost effective way as possible.

The system KAM-MERA is an example of the latest technology.

A way for us to always know "what's going on" in the shelves.

Advantages with external refilling:

- No need to organise and control.
- You can focus on your core-business.
- Mattssons probably pursue the improvements faster.
